***Coprinopsis variispora* and *C. flamboyani*: Errata Corrige**

Pietro Voto, Claudio Angelini

In the article Voto & Angelini (2025)* two unpleasant mistakes have caused erroneous reports of two herbarium numbers.

The holotype collection of *Coprinopsis variispora* Voto & Angelini *sp. nov.* was erroneously reported with the number JBSD13798; the correct number is JBSD130798. This correction complies with article 9.2 of the *International Code of Nomenclature for algae, fungi, and plants* (Shenzhen Code).

As regards the species *Coprinopsis flamboyani*, the herbarium number PADH0062320 was erroneously assigned to the collection ANGE1900; it instead represents a portion of the collection ANGE1943. Collection ANGE1900 was not preserved in any herbarium due to excessive mould.

* Voto, P; Angelini, C (2025) Third report of coprinoid fungi (*Psathyrellaceae*, *Agaricales*) in the Dominican Republic with notes on *Coprinopsis clastophylla*, rhacophylloid taxa and the *Coprinopsis afronivea* complex. *MycolObs* **11**:38–68
